INTERESTS

- Cinephile • Bodybuilding
- Instagram • Comuter Gaming
- Learning new Skills

EXPERIENCE

SORIIC | Full Stack Web Developer
May 2023 – Present

- Developed and deployed a Tours Management website featuring a backend powered by Node.js and a frontend using HTML, CSS, Bootstrap, and JavaScript.

- Conducted training sessions for fellow developers focused on Frontend Development technologies including HTML, CSS, JavaScript, Bootstrap, and React.

- Led the design and implementation of a Hotel Management application using React for the frontend and Supabase for the backend infrastructure.

- Designed and implemented the frontend architecture for Tripxcite, a comprehensive travel planning platform utilizing HTML, CSS, JavaScript, and Bootstrap.

- Successfully integrated third-party services such as Stripe, Leaflet, Mapbox, and React Stats Components into multiple websites to enhance functionality and user experience.

- Conceptualized and developed a stock images website leveraging the Pexels API, incorporating complete CRUD (Create, Read, Update, Delete) operations for managing content.

UPWORK & FIVERR | Graphics Designing
Jan 2019 – Present

- Demonstrated expertise in crafting impactful logos that capture the essence of brands, leveraging creativity and strategic thinking to leave a lasting impression on target audiences.

- Successfully developed cohesive stationery designs, including business cards and letterheads, to enhance brand professionalism and consistency across all communication channels.

- Spearheaded the creation of comprehensive branding strategies, translating brand identities into compelling visual elements to establish strong market presence and resonate with target demographics.

- Designed user-centric websites that seamlessly blend aesthetic appeal with functionality, providing engaging digital experiences and driving conversions for diverse clients across various industries.
